

Documentation of Annual Peer Review

The MN Midwives' Guild upholds the value of annual peer review as a supportive and educational means for midwives to ensure the safe and professional practice of midwifery. For this reason, we encourage, support, and recommend the peer review process be utilized by all midwives.

Midwives are strongly encouraged to seek the benefits of peer review opportunities, at least annually, to review practice standards and gain valuable input from the greater community of midwives in their geographical area.

Annual peer review should include (but may not be limited to):

* A review of all births attended since last review

* Evidence of current life saving certification(s)

Name _____ Lic. No. _____

Address _____ Date _____

Life saving certification(s) Current? ____ Review Completed? ____

Review approved by _____ Title/Office _____

All peer reviews should remain strictly confidential.
